

An Evening with NORCAL

The Next Generation Air Transportation System (NextGen) is a new National Airspace System being implemented across the United States in stages through 2025. Next Gen proposes to transform America's air traffic control system from a radar-based system with radio communication to a satellite-based one.

Northern California TRACON Front Line Manager, Tim Wilson, will discuss the changes and advantages of ADS-B in the NextGen System. He will also explain the new RNAV procedures being used at KSJC and how VFR flights through the area could be affected. There will be lots of time for questions and answers.

Directions: From HWY 1 Exit on Airport Blvd and head North on Airport Blvd. Make a left Turn on Aviation Way (0.7Mi from HWY 1) and destination will be on the airport side.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
